

**23rd CIRP Conference on
Electro Physical and Chemical Machining
CIRP ISEM XXIII 2027**

28th June - 1st July 2027, Cardiff, Wales, UK

Announcement

The conference originally entitled “International Symposium for Electro Machining (ISEM)” was held for the first time in 1960 in Czechoslovakia. Since then, the most significant advances in the field of Electro Physical and Electro Chemical machining technologies have found a common place for scientific and industrial discussion in this conference. ISEM now proudly takes place under the auspices of the CIRP (The international Academy for Production Engineering).

On behalf of the Organising Committee of **ISEM XXIII**, it is our honour to announce that the **23rd CIRP conference on Electro Physical and Chemical Machining** will take place in **Cardiff from 28th June to 1st July 2027**. The Conference will be organised by Cardiff University.

Main Topics

- Electrical Discharge Machining (EDM)
- Electro Chemical Machining (ECM), (ECDM)
- Laser Material Processing
- Additive Manufacturing
- Hybrid Processes
- Plasma Processes
- Ultrasonic Machining (USM)
- Abrasive/Water Jet Machining (AJM), (WJM)

Conference Venue

Centre for Student Life

Park Place, Cathays, Cardiff, CF10 3BB.
